Nisarg Patel

Ph.D. candidate

nvpatel@usc.edu   Los Angeles, California

Education

PhD	**University of Southern California**, Comparative Studies in Literature and Culture • Ph.D. Academy Certificate in Communication, Leadership, and Management (2025, USC) • Visual Studies Graduate Certificate (2024, USC) • USC Center for Excellence in Teaching Certificate (2024, USC) • Digital Media and Culture Certificate (2023, USC)	California, USA 2021 – present
Master of Arts	**University of Toronto**, Comparative Literature • GPA 3.97/4.00	Ontario, Canada 2019 – 2020
Bachelor of Arts (Honors)	**University of Toronto**, English Literature (major), Cinema Studies (minor), Literary Theory and Criticism (minor) • GPA 3.74/4.00	Ontario, Canada 2016 – 2019
Bachelor of Arts	**Indira Gandhi Open University**, Philosophy • First Class	India 2013 – 2016
Bachelor of Engineering	**Gujarat Technological University**, Production Engineering • GPA 8.14/10.00	Gujarat, India 2012 – 2013

Awards

Silver Medal, Outstanding Academic Achievement — 2019
St. Michael’s College, University of Toronto

Dr. Michael Lutsky Undergraduate Award in Humanities — 2018-2019
Jackman Humanities Institute, University of Toronto

Dean’s List of Scholars — 2016-2019
University of Toronto

Research Award for Outstanding Engineering Project — 2016
Birla Vishwakarma Mahavidyalaya

Publications

Zur Elektrodynamik bewegter Körper
It concerned an interpretation of the Michelson–Morley experiment and the properties of light and time. Special relativity incorporates the principle that the speed of light is the same for all inertial observers regardless of the state of motion of the source.
Albert Einstein
en.wikisource.org/wiki/Translation:On_the_Electrodynamics_of_Moving_Bodies

Über einen die Erzeugung und Verwandlung des Lichtes betreffenden heuristischen Gesichtspunkt
In the second paper, he applied the quantum theory to light to explain the photoelectric effect. In particular, he used the idea of light quanta (photons) to explain experimental results, but stressed the importance of the experimental results. The importance of his work on the photoelectric effect earned him the Nobel Prize in Physics in 1921.
Albert Einstein

Die Grundlage der allgemeinen Relativitätstheorie
The publication of the theory of general relativity made him internationally famous. He was professor of physics at the universities of Zurich (1909–1911) and Prague (1911–1912), before he returned to ETH Zurich (1912–1914).

Skills

Physics

Languages

German
Native speaker

English
Fluent

Interests

Physics

Certificates

Machine Learning Jan 2018

Quantum Computing Jan 2018

Quantum Information Jan 2018

Projects

Quantum Computing Jan 2018 – Jan 2018
Quantum computing is the use of quantum-mechanical phenomena such as superposition and entanglement to perform computation. Computers that perform quantum computations are known as quantum computers.

- Quantum Teleportation
- Quantum Cryptography
